2. Did the speaker use images, graphs, charts, and the features of Powerpoint etc. effectively? Were charts and tables simple and easy to follow? If not, why?

3. Did the speaker guide you through each slide, explaining data and illustrations and relating them to the overall content of the talk?

4. Did you understand the material and feel that you learned something new? Was there a clear 'take-home' message?

5. Did the speaker read directly from slides, or just use them to support points being made?

Other comments – what advice can you give the speaker for future presentations?
